

Affinity™ 9.C and 8.C Series Gas Furnaces

Affinity™ 9.C and 8.C Series high-efficiency gas furnaces are a step up for any home. That's because York® Affinity™ modulating gas furnaces continuously adjust their heating level by 1% increments to match the degree of comfort you need exactly and efficiently. In fact, they can maintain indoor temperatures to within 1/2 degree of your thermostat's setpoint.* The variable speed, ECM, blower slowly ramps up and down providing quiet and efficient air distribution while reducing overall utility consumption.

The Affinity™ 9.C is one of the highest rated gas furnaces in the industry (up to 98% AFUE), which means more efficiency and lower energy costs.

Also, the Affinity™ Series 9.C Modulating Gas Furnace recently received high accolades from [Consumer Digest](#) — providing further assurance York is a brand you can rely on. ([Consumers Digest, October 2010 — PDF, 3.5 MB](#))

*Actual results may vary.

Match Your Comfort Level By Degrees

- Modulating design uses a firing rate at 1% increments to match comfort levels more exactly
- Both models use a variable-speed blower which reduces electrical consumption
- Fewer starts and stops saves more fuel and operates more quietly
- Makes longer runtimes more affordable for more air infiltration to improve indoor air quality
- Adjustable for dry, temperate, or humid climates with [ClimaTraK™](#) technology

2009 AHR Expo Innovation Award - YP9C Gas Furnace

The York® Affinity™ Series YP9C 98% AFUE 33" modulating gas furnace recently was recognized as the winner in the heating category of the 2009 AHR Expo Innovation Awards Competition. It was chosen by a panel of professionals, selected for their knowledge and expertise in the HVACR industry.
